Crediting emissions' reductions for cement & concrete products
Call for NP rep to represent NP on Technical Working Group
Close date for EOI 15th January

Key to the Australian Government's policies to reduce greenhouse gas emissions is the Emissions Reduction Fund (ERF), where funding is made available to businesses with projects that reduce or avoid emissions. ERF projects must be in accordance with an approved 'method', which has been developed by a Technical Working Group. An overview of the ERF can be found [here](#).

National Precast has been invited to provide a representative to participate in the Technical Working Group tasked with developing a new method of crediting emissions' reductions for cement and concrete products. The Terms of Reference for the Group can be found [here](#).

Three Working Group meetings (held via teleconference) will be held through the development process. The first meeting has been held and the agenda for that meeting is available [here](#). The Scoping Paper that was discussed at that meeting can be downloaded [here](#). The second of the meetings is likely to be held in February.

ACRA's Guide to Concrete Repair and Protection (precast section)
Call for NP rep to participate in Working Group
Close date for EOI 15th January

The Australasian Concrete Repair Association (ACRA) is updating their Guide to Concrete Repair and Protection and as part of the update will be including a new section on precast concrete. National Precast has been invited to participate on the working group and accordingly we are seeking expressions of interest.

If you are interested in nominating for either of these groups (or know someone within your organisation who might be), please submit an Expression of Interest (link below) to Sarah at exec@nationalprecast.com.au, before close of business Friday 15th January.
