Who we are...

In 1990, a small group of precast manufacturers joined together to start National Precast. We have grown to become the peak body for the Australian precast concrete industry... the industry's recognised voice... comprising members both large and small, in all product categories, and across all states. We are an energetic group of individuals, passionate about precast, working vigorously to continue the remarkable growth of precast and represent its interests.

Become a member of National Precast and take your business to the next level...

Enjoy the many member benefits and share in the achievements that come from working with other precasters – not as competitors, but as peers. Take charge of your future. Work with us, as we lead the boom in precast.

Together we are strong... and from strength we can achieve change.
