

## Representation & Advocacy

February 2017

### **Call for Member to represent National Precast** **Close date for EOI Friday 17th March**

National Precast requires a representative for BD 084:

- **Revision of AS 4671 – Steel reinforcement materials**

Due to a recent change in the requirements of NP representatives, coupled with the high importance of this impending review, the NP Board has decided that it is in the interests of our industry that we seek to replace our current representative on the BD-084 Main Committee, with someone who is located in Australia. For effective representation and participation in the work of the Committee, it is important that our representative is able to attend both the Committee meetings, as well as NP Members' Meetings, in person.

Included in the review is the likelihood that the definition of 'steel producer' will be revised, which will potentially impact on precasters. We are seeking a suitably qualified person with a broad understanding of, and experience with, reinforcement.

Face-to-face meetings will be held at Standards Australia's offices in Sydney, with timing to be advised. However, where there are committee members from other states, one or more meetings may be held in other locations.
