

Representation & Advocacy

26 October 2015

AS 3850 is out and this is your chance to have a say

As I am sure you are already aware *AS 3850-2003 Tilt-up concrete construction* has now been revised and on 3rd September the new *AS 3850-2015 Prefabricated concrete elements* was published. The revised standard comes in two parts - AS 3850.1:2015 Prefabricated concrete elements - General requirements and AS 3850.2:2015 Prefabricated concrete elements - Building construction. National Precast has had an active role in the development of this standard, having two representatives (Jeff Stratford & Kevin Crompton) sitting on the committee.

We will be developing a position on a number of areas within the new standard and in order to speak on your behalf, we need your input. We have put together a brief nine-question survey, that should take no more than 5 minutes to complete. If you could please complete the survey within the next 2 weeks (**close date is 9 November**).

[Click here and complete it now. It only takes 5 minutes.](#)

The results of the survey will be discussed at the November Members' Meeting.
