Public comment open for *AS 5216 - Design of post-installed and cast-in fastenings in concrete*

&

Call for member to represent National Precast on ME-029

The ME-029 committee is currently finalising its review of *AS 5216 - Design of post-installed and cast-in fastenings in concrete*. The standard has been released for public comment, which closes on 15th January 2018. Note that the scope for AS 5216 was narrow; effectively upgrading the standard to an AS. NP members may wish to review the draft and provide comment to Standards Australia.

While the committee has undertaken the majority of work on AS 5216, it also covers a broad range of other standards (which can be reviewed [here](#)). National Precast is seeking suitably qualified nominations from Precaster and Supplier members for this committee.

Is likely that the committee would meet 2-3 times per year in Sydney/Melbourne (Skype also available). Please be advised that Standards Australia does not provide travel and accommodation expenses for the members attending the meeting; however it arranges lunch and refreshments during the meeting.
