New Standards available

We would like to take this opportunity to thank many of you for your feedback regarding our new Australian Standards service. We have recently refined our offering by adding an additional range of standards. This brings the total number of standards available to our full Precaster Members to 42.

As a result of member feedback, we have added:

- AS 3775.2:2014 Chain slings for lifting purposes - Grade T(80) and V(100) - Care and use
- AS 2321:2014 Short-link chain for lifting purposes
- AS 4497:2018 Roundslings - Synthetic fibre
- AS 1353.2:1997 Flat synthetic-webbing slings - Care and use
- AS 4991:2004 Lifting devices
- AS 1012.1:2014 Methods of testing concrete - Sampling of concrete
- AS 1012.3.1:2014 Methods of testing concrete - Determination of properties related to the consistency of concrete - Slump test
- AS 1012.8.1:2014 Methods of testing concrete - Method for making and curing concrete - Compression and indirect tensile test specimens
- AS 1012.9:2014 Methods of testing concrete - Compressive strength tests - Concrete, mortar and grout specimens
- AS 1012.10:2000 Methods of testing concrete - Determination of indirect tensile strength of concrete cylinders (Brasil or splitting test)

We appreciate your continued feedback regarding the services offered by the Association. The inclusion of these Standards will likely allow members who currently pay for a Standards subscription directly through SAI Global to cancel that subscription and reap the full cost saving from their National Precast Membership.
