

National Precast: Tertiary Institution Membership

Join the precast concrete industry's peak body and its dedicated team of industry professionals in transitioning the Australian construction industry towards a more productive and sustainable future. Today's students will build the future with precast.

Since 1990, National Precast has grown to become the industry's voice, comprising members both large and small, in all product categories and across all states. We are dedicated to representing the industry and providing our members with the help and services they need to achieve the industry's growth and sustainability objectives.

Let's work together to bridge the gap between academia and industry.

Membership Options

Tertiary Institution Partner

Take advantage of this unique opportunity to position your institution as a leader in the Australian construction industry. Provide your students with real-world resources, contacts and opportunities.

Let us serve as your connection to the precast industry and beyond, as you and your students immerse yourselves in one of the oldest forms of prefab. More than any other construction material, precast concrete offers the construction industry its best opportunity for sustainable growth and productivity improvement.

Tertiary Institution Partner membership costs \$10,000* and delivers well in excess of \$70,000 of value:

- Unlimited 12-month Professional Associate Individual membership packages to provide to your faculty's academic staff and students (each valued at \$300). These memberships would be administered and updated by you** and include:
 - Subscriptions to National Precast's electronic newsletters. Distributed to all members, the newsletters serve as a curated guide to what those in the industry need to read.
 - Subscriptions to a selection of third-party construction industry publications including Built Offsite, Construction Engineering Australia, BuildIT, Waste & Water Management, and many more.
- A 12-month digital read-only license for the Association's full suite of reference guides and publications, able to be shared with your faculty's academic staff and students (each one valued at \$1,200). This read-only access would be controlled by you.**

*Price ex GST, Membership fees are per calendar year and will be pro-rated if needed. Fees may be paid in quarterly or monthly instalments.

**Speak to your National precast representative more about this area of the relationship.

- The ability to be considered to receive an annual award for your precast-related research projects - projects that make outstanding progress in the field of precast concrete. This award provides the winner with:
 - A \$5000 cash scholarship.
 - The opportunity to have their research published in related industry journals/publication.
 - An invitation to attend and present their research to the precast industry's leaders and decision-makers at one of the Association's national meetings.
- The ability for one of your academic staff and one student to attend at no cost, National Precast's national meetings and the ability to register (and pay) for attendance at local and national social events.
- National Precast will author and distribute editorial material promoting the school and its related programs and courses, through its network of industry-specific publications.
- National Precast can provide expert speakers on a range of precast-related topics, or can facilitate factory visits, to provide your students with real life exposure to common practices and projects.
- Your students can access work experience opportunities with National Precast member companies, including precast factories and suppliers.
- 5 physical copies of the "Industry's bible" - The Precast Concrete Handbook - will be donated to your library. All Partners receive replacement copies every time a new version/revision of the book is released.
- You will be the first to be contacted if any of our members require research into a precast-related topic.

“By becoming a National Precast Tertiary Institution Partner, you are helping to support and recognise the vital role that universities, their faculties and students play in the future of the Australian construction industry.”

Sarah Bachmann, CEO National Precast

Tertiary Institution Member

If you are looking to play a more passive role but would still like to stay connected to what is happening in the industry then this option is for you. The Association will keep you informed via its newsletters and industry publications. As well, you will receive member's discounts when you purchase any of the Association's publication or attend its events. Membership of this category is free.

If either option is of interest to you please get in contact with National Precast today.
